Anticholinergic drug, elorine sulfate, 192

Aortic and coronary atherosclerosis, degree of, in necropsied cases of multiple myeloma, 165

Arctic environment and intestinal infection, 338

Arrhythmias, cardiovascular effects of sodium lactate in normal subjects and in various, 274

Arteriosclerotic heart disease, coronary, in younger age group, 494

Arthritis, rheumatoid, quantitation of activity of: 1. method for recording its systemic manifestations, 616

Atherosclerosis, degree of coronary and aortic, in necropsied cases of multiple myeloma, 165

Atrial fibrillation, established, problem of, 519

Azotemia, induced, in humans following massive protein and blood ingestion and mechanism of azotemia in gastrointestinal hemorrhage, 394

in gastrointestinal hemorrhage, mechanism of, induced azotemia in humans following massive protein and blood ingestion and, 394
